graylog

Create users and groups

First create a user and group `graylog`

```
useradd -u 1100 -m graylog
```

Add the user `graylog` to the sudo group

```
usermod -a -G sudo graylog
```

Add the user `graylog` to the docker group

```
usermod -aG docker graylog
```

Give the user the bash shell

```
usermod --shell /bin/bash graylog
```
